

557 B/b

4 March 1963

MEMORANDUM FOR: Deputy Director (Intelligence)

SUBJECT : NASA Support to the Intelligence Community

REFERENCE : USIB-D-33.2/3, 19 February 1963

1. The purpose of this memorandum is to recommend that you vote for approval of revision of DCID 3/4 so as to include the National Aeronautics and Space Administration in membership of the Guided Missile and Astronautics Intelligence Committee.

2. This recommendation has the unanimous support of interested components of the Agency. OSI particularly endorses the additional proposal to have NASA contribute some of its technical manpower resources to the analysis of intelligence data. OSI has already made provision for the accommodation of ten (10) NASA specialists within its Office space and also will help develop the security program to enhance the participation of NASA personnel in ad hoc intelligence problems.
